

# Mohammad-Al Fattah

## Software Developer

L25, KTHO, UTM, Skudai, Johor, Malaysia | +601139676477 | [rearfattah@gmail.com](mailto:rearfattah@gmail.com)

[simplify.000webhostapp.com/](https://simplify.000webhostapp.com/) [in linkedin.com/in/mohammad-al-fattah/](https://in.linkedin.com/in/mohammad-al-fattah/)

## Summary

I would like to help organizations to put their application idea into reality and make their desired application to grow their business and make more profit with just a tap of their fingertip. willing to face new challenges collaborating with others with a professional attitude and excel my carrier goal.

\*Final year project I am currently working on given in the Appendix-1

## Education

Bachelor of Science

2015 - present

[University Technology Malaysia](#)

School of Computing faculty of Engineering (Network and Security)

Current Study Year: 4rth Year 1st Semester

Current CGPA: 3.33 out of 4.0 after 6 (out of 8) semester

Study Abroad Exchange program

11-01-2018 - 25-05-2018

[Helsinki Metropolia University of Applied Science, Finland](#)

In 3rd-year 1st semester and I got an amazing opportunity for 1-semester exchange abroad which was completely sponsored by Erasmus+. Besides studying in Finland, I learned a lot about Finnish culture and their diversity. At the same time, it was a great opportunity to get connected with amazing people. Finally, I also visited the capital city of Estonia, Sweden, Germany, Austria, Hungary, Czech Republic, Latvia in one word it was really remarkable.

Higher Secondary Certificate Examination, 2013

2011 - 2012

[B.A.F Shaheen College, Tejgoan](#)

Group: Science

GPA: 4.70 out of 5.0

Passing year: 2013

Secondary School Certificate Examination, 2011

2009 - 2010

[Shaheed Police Smrity School and College](#)

Group: Science

GPA: 5.0 out of 5.0

Passing year: 2011

## Project Interest

- Android Application Development
- Internet of Things (IoT)
- Web Development
- Cyber Security
- Artificial Intelligence

## Technical Summary

### Programming Language

- JAVA
- OOP
- PHP
- JQuery
- MySQL
- JavaScript
- HTML5, CSS

### Applications

- Android Studio IDE
- Adobe Dreamweaver CC
- Arduino Micro controller IDE
- NetBeans IDE (version:8.2)
- php MyAdmin
- WAMP/XAMPP
- Cisco Packet Tracer
- Wire Shark
- Wondershare Filmora
- Microsoft Office
- Code Blocks
- Sublime Text3
- LaTeX

## Achievement

---

- Got selected for the Study Abroad in Finland for one-semester which was fully sponsored by Erasmus+
- Selected for the 9th ASCENT, SAGE, Tokyo Tech as a Participant on 2018
- Got Prize for Park Ninja Project Idea on Artificial Mini-Seminar at UTM on 2018 (Teamwork)
- Got 1st Prize for innovative Idea and poster Design on HCI day 2016 (Teamwork)
- 1st prize for both Badminton (single and double ) at ISSC'16 at Help University

## Hobbies

---

- Traveling and Campaign
- Visiting New Cities
- Playing Guitar
- Volunteerism

## Work experience

---

Intern 14 October 2018 - present

### E-Life Solutions Sdn Bhd

I worked here as an intern under the supervision of Prof. Dr. Eko Supriyanto in a software development team. As a part of my job, I managed to create a working report generating system using QtRPT report engine for Petronas Risk Management System and so on.

#### Responsibilities:

- Feature development to generate report in various formate.
- System Testing, for example, testing the usability of the application
- Software or firmware updating for all the running pc and testing device
- Software review for the final product

Application Developer 10 February 2017 - 29 February 2017

### Imagineering Institute

I joined a hardworking startup group to help them design an application for waste management and successfully done that project within time.

#### Responsibilities:

- Idea generation for the application navigation
- Design interface for better usability
- Creating Flow chart for different task
- Software review

## Co-Curriculum

---

- Participated in UTM Mobile App Hackathon (2017)
- Participated in User Study Day at Imaginengineering Institute (2017)
- Workshop on Android Application Development using Android Studio at UTM (2016)
- Workshop on Design Thinking at Center for Students Innovation, UTM (2016)
- Participate in Human-Computer Interaction Day at UTM (2016)
- Workshop on Ethical Hacking at UTM (2016)

## Extra Curriculum

---

- Worked as Junior Executive at Aisec Johor Bahru in Outgoing Exchange (OGX) team (2016-17)
- Participate in the Homestay program organized by the International Student Center at Penang for 3 days and Putrajaya for 3 days (2016)
- Volunteering at Penang school for young children (2015)
- Participate as organizer of Cultural night in International Cultural Mega Festival (ICMF) at UTM (2015)
- Participate in Badminton (Single and double) in International Student Sports Carnival organized by HELP University at Sha Alam Panasonic Sports Ground (2016)

## Language Proficiency

---

| Language | Speaking      | Reading   | Writing   | Listening |
|----------|---------------|-----------|-----------|-----------|
| Bengali  | Mother Tongue |           |           |           |
| English  | Excellent     | Excellent | Excellent | Excellent |

## Name of the Referees

---

### **Prof. Dr - Ing Eko Supriyanto**

Professor

Faculty of Engineering

School of Biomedical Engineering & Health  
Sciences

University Technology Malaysia

Skudai, Johor Bahru,

81310, Malaysia

Email: [eko@utm.my](mailto:eko@utm.my)

office: 075558551

### **Dr. Johan Bin Mohamad Sharif**

Senior Lecturer

Faculty of Engineering

School of Computing

Faculty of Engineering

Skudai, Johor Bahru,

81310, Malaysia

Email: [johan@utm.my](mailto:johan@utm.my)

Office: +601121360472

## Testimonial

---

I, the undersigned, certify that, to the best of my knowledge and belief, this Curriculum Vitae correctly describe me, my qualification and experiences.

.....

Mohammad-Al Fattah

Date: 18-03-2019

Place: Skudai, UTM

## Appendix-1

---

### **Project Name:**

#### **UTM VACANT CAR PARKING AVAILABILITY TRACKING SYSTEM (Park Ninja)** **MOBILE APPLICATION**

Nowadays GPS (Global Positioning System) has become one of the most used techniques to determine user's current location and provide an effortless way to reach the desired destination including turn-by-turn navigation, for example, Google Map application which allows the user to search for the location and step-by-step navigation. However, although google maps is providing amazing features still student and staff of University Teknologi Malaysia facing difficulties when it comes to determine the car parking availability in rush hour as there is no such application developed yet for them hence the UTM Vacant Car Parking Availability Tracking System (Park Ninja) mobile application will be developed to provide information about nearby car parking spot availability to face this current challenges of finding parking spot as a medium. Park Ninja will use the Google Map application programming interface (API) to locate the location coordinate of the available parking spot which will upload into Google cloud service Firebase Database thus the user can access the data using mobile apps and get the direction of that parking spot. Arduino microcontroller has been used to determine the availability of car parking locations by using the ultrasonic sensor (model HCSR04) and wifi module (model esp8266) used for demo purpose inside UTM. To upload the real-time data to Firebase Database about vacant parking spot Nodemcu ESP8266 Wi-Fi integrated development kit has been used. Until this point, around 80 percent of development has been achieved.

For this project, Rapid Action Development (RAD) methodology used to develop a complete application in order to ensure fast and quality development. In addition, for the purpose of developing the whole system of UTM Vacant Car Parking Availability Tracking application, 3-tier Architecture will be used which includes presentation tier, logic tier, data storage tier. With Park, Ninja application user will able to determine the nearby parking spot including the availability of the remaining parking spot. It also allows the user to give feedback regarding the application to the admin in order to improve the overall service of the application. Park Ninja application will bring benefits to both students and staff by determining the availability of parking spot inside UTM. However, later on, the coverage of ParkNinja App will be extended further to open the door for the commercial use.
